UE23CS352B – Object Oriented Analysis & Design

LAB GUIDELINES

Week No.	Lab Assignment
1	Online UML Tools Demo, java Installation
2	Case Study on Usecase Diagram
3	Case Study on Class Diagram
4	Case Study on Activity Diagram Mini Project – Use case Diagram
5	Case Study on State Modeling, Mini project – Usecase Modeling
6	Interfaces & Method Overloading
7	Inheritance & Abstract Class
8	MVC pattern implementation
10	Mini project – Detailed Class Diagram
11	Mini project -Activity & State Diagram
12	Mini Project – MVC implementation
13	Creational Design Pattern
14	Structural Design pattern
15	Mini Project Implementation

Lab Assignment: Every lab is evaluated for 10 Marks

Lab Assignment contains 4 components:

a. UML Modeling & Design Principles / Patterns Case Study

b. Java Programming

c. Mini Project

d. Viva

a) UML and Design Principles/Pattern Case studies (7 numbers – 2 hours each)

The students will be given a case study to prepare different UML Diagrams and the student submission will be evaluated against the most suitable solution.

Tool for UML diagrams : Star UML

b) Java Programming (2 numbers – 2 hours each)

The students will be given coding problems and specific features using which that problem has to be solved.

c) Mini-Project: (15 hours)

The students have to form a team of 4 members and choose a problem. They need to prepare UML Diagrams for the same and use MVC Architecture and Design Principles and Patterns to develop a solution for the chosen problem and implement the same using java.

d) Viva

Viva will be taken during lab sessions for week number 10, 11 and 12. There will be one Viva per student based on the topics covered till week #8.

Viva weightage of 10 marks will be added with lab marks.

Lab Submission -

For every lab, google form link for students to submit the lab solution will be provided.
The lab solutions submitted will be evaluated on weekly basis.
